Vocus CEO elected to APNIC EC

Sydney (4/03/09) – CEO of Australian Wholesale Voice and Internet provider Vocus has been elected to the Executive Council (The Board of Directors) of the regional Internet registry APNIC (Asia Pacific Network Information Centre).

The election was held at the organization's Annual Member Meeting held in Manila on Friday 27th February.

APNIC provides allocation and registration services that support the operation of the Internet in the Asia Pacific region. More specifically it is the body which allocates IP address and AS numbers to Service Providers, National Internet Registries and Telecommunications companies.

"It's a great result to be elected, and I hope to be able to contribute greatly to APNIC over the coming two years" said Spenceley.

"The next two are critically important for the Internet globally, we will without doubt see the exhaustion of the IPv4 address space. This is the largest issue to confront the Internet and as such will have significant effect on the all aspects of our Industry", Spenceley remarked.

APNIC is one of five Regional Internet Registries currently operating in the world. It provides allocation and registration services which support the operation of the Internet globally. It is a not-for-profit, membership-based organisation whose members include Internet Service Providers, National Internet Registries, and similar organisations. APNIC represents the Asia Pacific region, comprising 56 economies.
