MEDIA RELEASE

Vocus announces half million dollar deal with TransACT

Sydney, 17 June 2009: Following hot on the heels of soaring sales for Q1, wholesale voice and Internet provider Vocus has now signed a deal worth well over half a million AUD with TransACT.

TransACT has recently consolidated its transit providers, and this deal positions Vocus as the company's primary IP transit provider, with the service set to continue to upgrade over the coming months.

Vocus CEO James Spenceley explains that Vocus' good reputation within the telecommunications Industry helped to clinch the deal.

"We quoted for TransACT last year, but although they liked the proposal there was a concern that we were simply too new to be seriously considered. It's very satisfying that a company with the size and reputation of TransACT now sees Vocus as mature enough to be selected as a major provider to the company."

TransACT Chief Executive Officer Ivan Slavich said, "Although the company is still young, the Vocus team was very responsive to our specific needs. They have a genuine focus on customer service."

Vocus' talented engineers work to rapid response times and typically connect customers in one day, rather than the industry standard 21 days. In addition, customers receive their contracts within 24 hours of agreeing the pricing structure and Customer's have direct access to senior engineers rather than a first level helpdesk.

"We may have hesitated about Vocus a year ago, but the company's reputation has demonstrated that they are now a key industry player. We look forward to working with Vocus in the future," continued Mr Slavich.
