VEEAM® BACKUP CONNECT.

CLOUD BASED BACKUP SOLUTIONS.

Veeam® Backup Connect, Powered by Vocus, makes it easy to extend your backup infrastructure to the cloud, providing you with the additional peace of mind that comes from knowing your data is securely backed up offsite.

Vocus Veeam® Backup Connect integrates hosted backup repositories (called cloud repositories) directly into the Veeam® backup console. There's no VPN, no separate console, and Vocus cloud repositories work like other backup repositories – except they're available even if the primary backup repository fails.

The connection to Veeam® Backup Connect is over a secure Internet HTTPS connection, so configuration of firewalls is usually not required

OUR SOLUTION TO YOU:

- Rapid, one-step backup and data recovery
- Hosted offsite backups in the secure, enterprise-grade Vocus Private Cloud
- Complete visibility and control from the backup console
- Support for all major Enterprise operating systems.
- Veeam® Backup Connect delivers strong and reliable functionality to help avoid the risk of data loss.

FEATURES AND BENEFITS

USE EXISTING INTERNET OR IPWAN BANDWIDTH

Cost effective and secure, with no need to amend your connectivity.

EASY EXTENSION TO THE CLOUD

Veeam® users can easily extend their backup infrastructure to the Vocus Cloud.

FILE OR VM BACKUP

You have the ability to restore your VMs or Files in the case of an unforeseen event.

SIMPLE MONTHLY PRICING

Easy bill reconciliation with a monthly storage charge based on your contracted amount.

ON NET DISCOUNT

You're rewarded with a 1c/GB discount when you connect with a Vocus network service

QUICK TO PROVISION

No time wasted – point and click and presto! Your Vocus Cloud repositories appear in your backup infrastructure!
